PROFESSIONAL SUMMARY

Backend Django Developer with 6+ months of internship experience building REST APIs using Django and Django REST Framework. Contributed to multiple client projects involving CRM, AI Voice Agent, Attendance Management, and Business Automation. Experienced with PostgreSQL, Celery, Django Channels, WebSockets, Redis, JWT Authentication, and database query optimization.

TECHNICAL SKILLS

- **Programming Languages**: Python,Java
- **Frontend** : HTML,CSS,AJAX,Jquery
- **Backend** : Django, Django REST Framework
- **Authentication**: JWT, Token Authentication, RBAC
- **AI/LLM**: OpenAI API, Llama 3.2, LangChain, MCP
- **Database**: PostgreSQL
- **Realtime** : Django Channels, WebSockets
- **Caching & Messaging**: Redis, Celery
- **Tools**: Git, GitHub, Postman

WORK EXPERIENCE

Backend Developer Intern

Dcs Divergent Consultancy Services |Feb 2026 – Present

- Developed backend solutions for multiple client projects using **Python, Django, and Django REST Framework.**
- Built **40+ REST APIs**, implemented authentication mechanisms, and integrated third-party APIs including the **Meta (Facebook) Ads API**.
- Worked with **Celery, Django Signals, WebSockets,** and **PostgreSQL** to develop scalable backend features.
- Developed an AI voice-calling agent, integrating the Vobiz API for voice communication and token-based authentication.
- Built multiple MCP tools to enable AI voice agents to interact with backend services and perform automated tasks.
- Optimized database queries using select_related(), prefetch_related(), **caching**, and **Django Debug Toolbar.**
- Collaborated with developers using **Git/GitHub** and tested APIs with **Postman**.

PERSONAL PROJECT

Event Ticketing & Management System (Django REST API)
Github link
Key Highlights :

- Built REST APIs for events, categories, pricing tiers, and ticket bookings with **JWT authentication and role-based permissions.**
- Integrated **Razorpay** with a **1-hour temporary seat reservation** system; unpaid reservations are automatically cancelled using **Celery Beat.**
- Implemented **Celery-based email notifications** for seat reservations and successful payments, including PDF ticket attachments.
- Implemented dynamic pricing for Gold, Silver, and VIP tickets.
- Optimized queries for upcoming, sold-out, and past events, along with user booking history APIs.

Tech Stack: Python, Django, Django REST Framework (DRF), PostgreSQL, Redis, Celery, REST APIs, Swagger, Git, GitHub, Postman.

Employee Management System (Full-Stack Django)
Github link || **live demo**
Key Highlights

- Implemented RBAC for Admin, Manager, and Employee roles
- Separate registration flows with email activation
- Manager dashboard for AJAX-based task CRUD (no page reload)
- Employee module for daily progress updates & task tracking
- OTP-based password reset and secure authentication
- Integrated AI chatbot using LangChain (Groq) + LLaMA 3.3 for project queries
- Responsive UI using Bootstrap

Tech Stack: Django, DRF, PostgreSQL, HTML, CSS, JavaScript, AJAX, Bootstrap, LangChain (Groq),GitHub
